

Comfort, safety, security.

You'll have an added sense of security knowing that your pool is comfortable and slip-resistant. Because SGM selects quartz aggregates that are smaller than pebble surfaces, the surface is comfortable to bather's feet. And in this age of safety consciousness, Diamond Brite is the ideal surface where wet, slippery conditions are a concern.

Relax and enjoy.

In developing Diamond Brite, SGM made ease of maintenance a top priority. The impervious quartz used in Diamond Brite resists stains and etching caused by harsh pool chemicals. And, unlike existing pool plasters, Diamond Brite pools can be drained and cleaned without being damaged. Additionally, the accent colors in Diamond Brite give the surface a variegated appearance, masking the slight imperfections that are readily apparent in traditional finishes.

*for Beauty
and
Durability*

DIAMOND BRITE®

All you add is the perfect setting. There's more to a great pool finish than meets the eye. A great pool finish is durable, comfortable, easily maintained, and pleasing to the eye. Diamond Brite from SGM is all that and more. Diamond Brite combines natural quartz aggregates, polymer-modified cement and non-fading Diamond Quartz in a stunning variety of colors. The result is a unique finish that stands up to the harshest pool environments while providing years of enjoyment.

The lasting beauty and durability of a diamond.

Unlike traditional marble-based pool plasters, Diamond Brite is made with natural quartz, one of nature's hardest and purest minerals. Marble aggregates are easily dissolved by pool chemicals causing unsightly etching and rapid deterioration. Diamond Brite's insoluble quartz aggregate is unaffected by the harshest pool chemicals and resists permanent staining. Also, the Diamond Quartz accent colors won't rust, rub off or fade like other colored aggregates because the pigment is ceramically bonded to the quartz aggregate. Finally, state-of-the-art polymer modification of Diamond Brite's cement increases hardness, improves bonding and reduces water penetration. All this adds up to a beautiful yet durable pool finish.

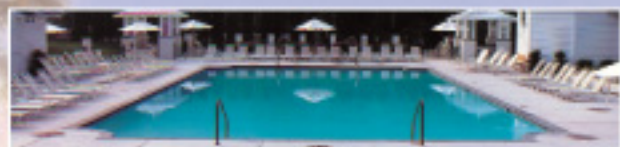

DIAMOND BRITE Exposed Aggregate Pool Finish, Outshines Even the Sun.

Express yourself with color.

Let your pool or spa be a reflection of you. Diamond Brite gives you a wide variety of factory-blended finishes so it's easy to coordinate your pool's color scheme.

Two or more Diamond Brite selections can be blended to create unique finishes that complement exotic poolscapes.

The choice of professionals worldwide. There are hundreds of thousands of Diamond Brite pools and spas in use at major water theme parks and attractions, international resorts and hotel chains, competition pools, military training facilities, condominium and residential pools. SGM's Diamond Brite is clearly the choice of quality contractors, architects, and designers worldwide.

Versatility

Diamond Brite offers a selection of tranquil colors that are factory blended to perfection. And if you're so inclined, we can even custom blend our premium finish to express a unique poolscape. Diamond Brite can help you achieve an environment of tranquility and beauty, sensible practicality and superior longevity.

Advantages

Diamond Brite quartz aggregate has millions of brilliantly colored quartz granules equaling more durability and lasting color. Diamond Brite evokes the richest quartz color showing all the way thru to the bottom of the pool, spa or fountain. Diamond Brite's colored quartz appearance is enhanced with time.

Warranty

You can rest assured that the highest quality products have been used and is supported by the best warranty program in the industry. It's a sign of our commitment to achieve the highest quality standards in all our swimming pool and spa finishes.

Sample colors are a screen as modern printing technology can produce. Final water color may vary due to lighting conditions at job site, staining, pH and installation method. For best results, use a wet sample when choosing colors.
